

In – Sight™

Computer based interactive X-Ray Operators Training Program

In-Sight is a unique interactive training system developed by ICTS. The program, developed specially for X-Ray operators, simulates various situations which the operators may face during daily routine. Insight, certified by FAA (Federal Aviation Administration) is used in many European Countries and USA by thousands of users.

Characteristic features of Insight :

- Hundreds of multimedia presentations, video clips and simulations
- Attractive, user friendly nature
- Multi language options
- Usage Availability on single PC or on network
- Theoretical and practical exam options
- Trainee statistics database
- Picture and X-Ray image catalogues of threatening and non-threatening materials
- Availability to be installed at any PC with multimedia features.
